

Vertiv™ Liebert® CWA from 200 to 500 kW

Chilled Water Thermal Wall Unit

Unleash Your Cooling Density Potential.

Vertiv™ Liebert® CWA, the highly efficient, ready-to-use Thermal Wall for slab floor data center applications.

- High unit performance rating accuracy, certified by laboratory tests.
- Specially designed coils to best suit new data center market trends.
- Easily maximize cooling density with a compact solution and ensure cooling continuity for your data center.
- Optimize the overall system with Vertiv™ Liebert® iCOM™ smart control using specially designed algorithms for non-raised floors.
